

ATTENTION

If you are not a registered pellet fire installer, and do not have legitimate access to the necessary passwords to install and program the Ravelli or Enviro Wood Pellet fire, you MUST NOT install or attempt to install the fire.

The Ravelli Wood Pellet fire requires technical programming and individualised air pressure adjustments to ensure it will operate safely and efficiently, and to avoid possible damage to the fire or the home.

Installation of the Ravelli or Enviro Wood Pellet fire by a non-registered installer will void the warranty, and may result in your local authority refusing to approve the necessary permits.

If you require a registered Pellet Fire Solutions Installer, please contact us directly on 03 9290057 or email to info@pelletfiresolutions.co.nz
